

Easter Bunny Bag

Materials Needed:

Paper bag with handles 8" w x 11" h approx. size

Terial Magic (treat all fabric before cutting)

White fabric for face and ears

Light Pink fabric for eyes and nose

Dark Pink or contrasting fabric for inner ears and bow tie center

Small print fabric for bow tie

Glue or Low heat glue gun

Black sharpie pen

2 - Googly eyes 1/4" - 1/2" dia.

1. Treat fabric with Terial Magic, dry and press. Cut all bunny and bow tie pieces from corresponding fabrics. See cover image for ideas. Terial Magic treated fabric cuts like a dream. Each of the small pieces can be cut while holding them to fabric with fingers, no pins needed. Larger pieces use 1-2 pins to hold in place while cutting.

2. Lay white bunny face on top of template and trace under eyes and mouth using sharpie pen. (fig. 1)

3. Using template: glue inner eye to eye ball, add googly eyes on center top. (figure 2) Glue inner ears to center of outer ears. (figure 3) Glue bow tie center to bow tie. (figure 4) Glue ears behind face where they overlap on template. (figure 5)

4. Assembly: arrange face and bow tie on bag, keeping bow tie above bottom of bag. Lightly mark with pencil where edges of ears and face align on bag to use as guides while gluing. Starting with ears, fold them forward where they hit bag edge to mark the glue line. On back side of ears (one at a time), place a bead of glue near edges and up to fold then adhere to bag, using guides to position. Fold face forward and away from bag and place bead of glue around edges and adhere to bag. Place bead of glue on back or bow tie and place above bag bottom, centering with face and adhere to bag. Finish by gluing bow tie center to bow tie.
